Reimagining the Experience

About Fidelity Investments

Fidelity is a global financial services institution serving individual investors, financial advisors, and institutional clients.

It operates as both a custodian and a clearing firm, providing the core operational backbone for advisory businesses.

Through its CRM environment and Wealthscape platform, Fidelity enables account management, trading, reporting, servicing, and other day-to-day advisory solutions.

At its core, the focus lies on equipping advisors and institutions with secure, reliable systems to support efficient operations and strong client outcomes.

What's Next?

The Question That Started It All

How do we turn a functional but underutilized AppExchange app into a powerful, intuitive experience that advisors actively choose to use?

The App As It Exists Today

What Does the App Do?

Today's Experience

The app supports core account visibility and servicing tasks inside Salesforce

Why the App Exists

Reduce system-switching by bringing essential Wealthscape actions closer to the advisor's daily workflow on their CRM

Existing Functionalities

Account Opening

Address Update

Balances and Positions Visibility

Alerts Visibility

Account Profile Overview

Owner Linking

How the App Connects Wealthscape to CRMs

Who Is the App For?

Clearing Firms

Firms that process, settle, and reconcile trades and transactions across accounts

Handle higher operational complexity and larger transaction volumes

Require advanced workflows, configurability, and automation

Usually have strong internal technical teams and expect systems to integrate deeply into their existing stack

Evaluate tools based on scalability, flexibility, and control, not just functionality

Custody Firms

Firms that hold and safeguard client assets on behalf of investors

Typically rely on simpler, standardized workflows for account servicing

Prioritize operational efficiency, reliability, and ease of use

Often have limited in-house technical capability and depend more on vendor-provided tools

Value solutions that work out of the box with minimal customization

Key Personas

Primary

Advisors

Handle client relationships and execute account actions on the CRM and Wealthscape

Secondary

Home Office/ Operations Team

Central decision-makers responsible for compliance oversight, reporting, approvals, and ongoing account maintenance

Occasionally support or complete account opening activities

Firm Leadership

Oversee client relationships and firm-level performance

Where the App Falls Short

System Switching

Advisors need to switch between two systems to complete one job, breaking focus and continuity

Click Fatigue

Even simple actions require too many clicks, making routine tasks feel heavy

Scalability Gap

Clearing and bigger Custody firms don't feel the need for the app, as it does not yet scale to their operational complexity

From Insights to Action

**An uninterrupted advisor
experience, enabled by
Salesforce, AppExchange,
and Wealthscape
working as one**

The Vision

Advisors should spend less time navigating systems and more time guiding clients.

The app should enable advisors to complete as much of their client-servicing work as possible within their CRM, while seamlessly supporting the steps that still require Wealthscape.

The Goal

Ensure successful rollout

Increased and continued adoption

Proposed Solutions

Defining & Designing Through Prototypes

- We used a tool called Figma Make to quickly visualize and shape proposed workflows before development
- Interactive prototypes helped teams align early, reduce ambiguity, and iteratively refine flows before build decisions
- Each workflow presented next is supported by a clickable prototype for deeper exploration

On the pages that follow, click the indicated link to view the prototype for that workflow

Explore the flow here: [Flow Name](#)

Account Opening (Wealthscape + Salesforce)

A Salesforce-first flow that creates a draft Financial Account record, allowing advisors to review, edit, and validate data in Salesforce before finalizing account creation in Wealthscape

Advisors

Home Office

The screenshot shows the FSC Wealth Management interface. A modal titled 'Open New Account - Summary' is displayed, indicating 'Step 4 of 4' and '100% Complete'. The modal contains the following information:

- Account Details Summary:**
 - First Name: John
 - Middle Name: N/A
 - Last Name: Doe
 - Date of Birth: N/A
 - SSN: N/A
 - Phone Number: (555) 123-4567
 - Email Address: fidelity_client**yz@fmr.com
 - Address Line 1: 245 Summer Street
 - Address Line 2: N/A
 - City: Boston, State: MA, Zip Code: 02210, Country: usa
- Employment Information:**
 - Employment Status: [blank]
 - Employer Name: [blank]
 - Occupation: [blank]

At the bottom of the modal are 'Back' and 'Save to SF & Send to WS' buttons. The background interface shows a 'Person Account' for 'Fidelity Client' with various tabs and a summary of financial accounts.

Enhancements

- Initiate account opening with editable client data
- Save inline edits
- Validate account field formats
- Create a draft financial account
- Display draft accounts with a draft status
- Allow advisors to update draft account details

Benefits

- Reduces rework by allowing corrections before submission
- Improves clarity around account status
- Improves data quality by allowing verification

Explore the flow here:
[Account Opening \(SF+WS\)](#)

Account Opening (Wealthscape)

A Salesforce-initiated flow to review and submit account details before completing the full account opening process directly in Wealthscape

Advisors

Home Office

Enhancements

- Initiate account opening with editable client data
- Save inline edits
- Validate account field formats

Benefits

- Reduces rework by allowing corrections before submission
- Improves data quality by allowing verification

Explore the flow here:
[Account Opening \(WS\)](#)

Address Update

A step-by-step flow to update addresses once and apply them selectively across Person and Financial Accounts

Advisors

Explore the flow here:
[Address Update](#)

Enhancements

- Update multiple address types from a central location
- Present a summary of changes before confirmation
- Shortcut to update another address from the final screen

Benefits

- Removes confusion around where address updates should be made
- Reduces manual effort by updating addresses once instead of many times
- Improves ease of completion through a clear and simple call to action

Owner Linking

Financial Account Level

A record-level workflow that links a Financial Account to its correct owner and address source when the linkage is missing or incorrect

Advisors

Enhancements

- Link multiple unlinked financial accounts in one flow
- Hide already linked owners automatically

Benefits

- Fastens fixes for individual accounts
- Improves visibility into which accounts are linked

The screenshot displays the 'Account Details' page for a 'Wealthscape Account Profile'. A modal titled 'Link Records - Configuration' is open, showing the process of linking records. The modal includes a dropdown for 'Record: TEST HAW CO (Wealthscape Source Record)' and a list of roles to choose from: 'Aryan (Financial Account)' and 'Khushi (Financial Account)'. The 'Next' button is highlighted. The background shows the 'Account Information' section with fields like 'Individual Type', 'Account Name', 'Account Number', 'Registration Type', 'Occupation', 'Marketing Segment', 'Rating', 'Phone', and 'Mobile'.

The screenshot displays the 'Account Details' page for a 'Wealthscape Account Profile'. The 'Owners' tab is selected, showing a table of current account owner data in Salesforce. The table has columns for 'NAME' and 'ADDRESS'. The data includes 'Howell Driscoll person Account', 'TEST HAW CO', and 'DRISCOLL SEARS'. A yellow banner at the bottom indicates '2 records need to be linked to Salesforce'.

NAME	ADDRESS
Howell Driscoll person Account	TEST ADDRESSLINE123\nDASD A, NC\n27558
TEST HAW CO	No Salesforce record
DRISCOLL SEARS	No Salesforce record

Explore the flow here:
[Owner Linking - Financial Account Level](#)

Bulk Owner Linking

A guided bulk-linking flow to connect Financial Accounts to the correct owners address source when the linkage is missing or incorrect

Advisors

UI mockup of the Bulk Owner Linking flow, showing a list of advisors and their associated financial accounts. The interface includes a navigation bar with tabs A through Z, a search bar, and a list of advisors with expandable sections for each. The first advisor, Alice Anderson, is expanded, showing her financial account role (Michael FAR) and address source (Wealthscape: 456 Ash Ave, Cambridge, MA 02138). Other advisors listed include Robert Anderson, Lily Edwards, Owen Nelson, Claire Irving, and Xavier Jackson.

Explore the flow here:
[Bulk Owner Linking](#)

Enhancements

- Identify unlinked Financial Accounts across Person Accounts in a dedicated tab
- Select and update multiple Financial Accounts at once

Benefits

- Reduces effort by enabling account linking from a single, centralized view
- Reduces data mismatches

UI mockup of the Bulk Owner Linking flow, showing a list of advisors and their associated financial accounts. The interface includes a navigation bar with tabs A through Z, a search bar, and a list of advisors with expandable sections for each. The first advisor, Alice Anderson, is expanded, showing her financial account role (Michael FAR) and address source (Wealthscape: 456 Ash Ave, Cambridge, MA 02138). Other advisors listed include Robert Anderson, Lily Edwards, Owen Nelson, Claire Irving, and Xavier Jackson. The interface also includes a 'Link Records' button and a 'Next' button.

Alerts and Tasks

An action-oriented alert experience to convert notifications into trackable tasks directly within Salesforce
